

FAQ's HSR-Portal for geodata4edu

Frage	Server Error Meldung nach Anmeldung auf dem Browser?
Beschreibung	<p>Nach Anmeldung auf https://geodata4edu.hsr.ch/portal kommt eine Server Error Meldung</p> <hr/> <p>Server Error in '/portal' Application.</p> <hr/> <p><i>Runtime Error</i></p> <p><small>Description: An application error occurred on the server. The current custom error settings for this application prevent the details of the application error from being viewed remotely (for security reasons). It could, however, be viewed by browsers running on the local server machine.</small></p> <p><small>Details: To enable the details of this specific error message to be viewable on remote machines, please create a <customErrors> tag within a "web.config" configuration file located in the root directory of the current web application. This <customErrors> tag should then have its "mode" attribute set to "Off".</small></p> <pre data-bbox="443 846 657 949"> <!-- Web.Config Configuration File --> <configuration> <system.web> <customErrors mode="Off"/> </system.web> </configuration> </pre> <p><small>Notes: The current error page you are seeing can be replaced by a custom error page by modifying the "defaultRedirect" attribute of the application's <customErrors> configuration tag to point to a custom error page URL.</small></p> <pre data-bbox="443 994 863 1093"> <!-- Web.Config Configuration File --> <configuration> <system.web> <customErrors mode="RemoteOnly" defaultRedirect="mycustompage.htm"/> </system.web> </configuration> </pre>
Lösung	<p>Anmeldung erfolgte mit einem Internet Browser. Der IE Browser verdoppelt die URL Adresse, wodurch das Portal nicht erreichbar ist. Im IE Browser die doppelte Adresse löschen. Ansonsten nach Möglichkeiten mit anderem Browser (Firefox, Chrome, Safari,..) arbeiten.</p>
